

ULTIMATE TRACK

Specialist Fabric Walling Track

Key Features :

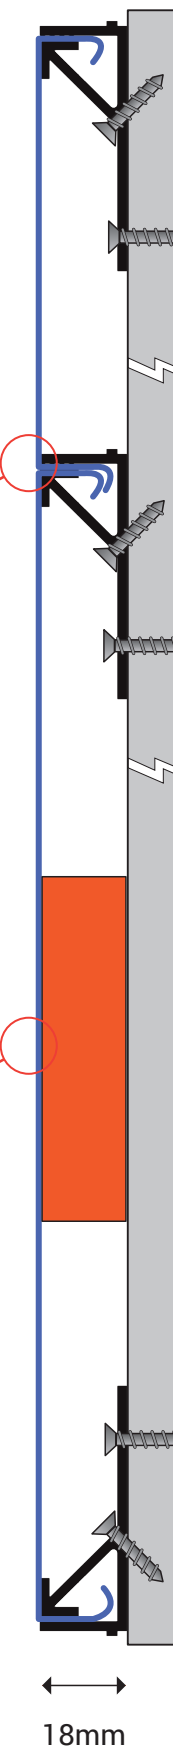

- Manufactured in the UK
- 18mm Leg Height
- Comes in 2.3m Lengths
- Cost effective walling solution
- Easy to install
- Very versatile
- Strong Construction
- Large fabric channel

The extra width of the Ultimate Track system makes it simple to overhang the track to create a hidden channel for LED Lighting

One track for all applications! The use of a thicker outside leg allows the track to function as both a perimeter AND intermediate track

By using an 18mm Track Height, standard 18mm plywood or mdf can be used as a support backer to support TV's, Lights, Speakers etc

18mm High leg allows larger area to push fabric into and also to use standard ply or mdf as support pads

Track Angled leg allows stitching screw to be added to secure track fully and adjust corner fit

The extra wide track allows the use of Automatic Collated screw guns to be used for the quickest installation

Track Groove keeps edge of track at a consistent gap from wall to allow fabric jaws to open correctly

Extra thick track construction allows track to be screws without pre drilling and adds to track strength and durability
